

# **Refresher Course on Melanoma Cancer Radiation Oncology – Learning Objectives**

Radiation oncology has an increasingly important role in the management of melanoma, especially in complex and metastatic cases. This course provides a curriculum mapped overview of how radiotherapy integrates with other oncology pathways to create optimal treatment and care in a multidisciplinary setting.

## **What You Will Gain**

- Best practices for cross-sectional imaging and staging (CT, PET, MRI)
- Radiotherapy considerations in locoregional and metastatic melanoma
- Management of brain metastases (MRI-based staging)
- Coordination with systemic therapy and surgery

## **Why the course is unique**

- Real multidisciplinary faculty teaching live
- Case-based integration of RT with systemic and surgical management
- Curriculum-mapped content ensuring relevance to real-world MDT practice
