

## **Refresher Course on Melanoma Cancer Pathologist – Learning Objectives**

Pathology drives every major decision in melanoma treatment. Deepen your impact on clinical decision-making: from defining melanoma subtypes to guiding targeted therapy through molecular profiling. This course provides a curriculum mapped overview of how pathology integrates with other oncology pathways to create optimal treatment and care in a multidisciplinary setting.

### **What You Will Gain**

- Subtypes of melanoma and their clinical implications
- Understanding how pathology drives systemic therapy choices
- Interpretation and use of molecular prognostic markers
- DNA profiling and its role in guiding targeted therapies
- Effective communication within MDTs and molecular tumour boards

### **Why the course is unique**

- Real multidisciplinary faculty teaching live
- Case-based integration of pathology with systemic, radiation and surgical oncology management
- Curriculum-mapped content ensuring relevance to real-world MDT practice
