

## **Refresher Course on Melanoma Cancer Surgical Oncology – Learning Objectives**

Stay aligned with the latest surgical standards in melanoma management — from optimal margins to the modern role of SLNB and new evidence eliminating routine CLND.

This course provides a curriculum mapped overview of how surgical oncology integrates with other oncology pathways to create optimal treatment and care in a multidisciplinary setting.

### **What You Will Gain**

- Updated indications for wide local excision
- Current evidence on sentinel lymph node biopsy
- Why completion lymph node dissection is no longer the standard of care
- How surgical decisions integrate with systemic and radiation therapies
- Collaborative planning with multidisciplinary teams

### **Why the course is unique**

- Real multidisciplinary faculty teaching live
- Case-based integration of surgical oncology with systemic and radiation oncology management
- Curriculum-mapped content ensuring relevance to real-world MDT practice
