

Refresher Course on Melanoma Cancer Radiologists – Learning Objectives

High-quality imaging is central to melanoma diagnosis and treatment planning. Gain clarity on imaging standards for melanoma staging and treatment planning and strengthen cross-disciplinary communication with oncologists and surgeons. This course provides a curriculum mapped overview of how radiology integrates with other oncology pathways to create optimal treatment and care in a multidisciplinary setting.

What You Will Gain

- PET/CT, CT and MRI staging requirements
- Brain MRI protocols before systemic therapy
- Imaging interpretation linked to surgical and systemic decisions
- How radiology supports MDT tumour boards

Why the course is unique

- Real multidisciplinary faculty teaching live
- Curriculum-mapped content ensuring relevance to real-world MDT practice
