

Refresher Course on Melanoma Cancer Medical Oncology – Learning Objectives

The ESO Melanoma Refresher Course is designed to master the newest systemic therapy evidence in melanoma — including optimal sequencing, biomarker-driven decisions, and real-world toxicity management. This course provides a curriculum mapped overview of how medical oncology integrates with other oncology pathways to create optimal treatment and care in a multidisciplinary setting.

What You Will Gain

- Use of molecular profiling and biomarkers in real-world settings
- Management of immune-related adverse events using modern algorithms
- Adjuvant and neoadjuvant therapy decision pathways
- Integrating clinical trials into treatment planning
- Latest in immunotherapy, targeted therapies, adjuvant/neoadjuvant approaches
- How to select molecular testing and integrate biomarkers
- Evidence-based sequencing for stage IV treatment
- Participation in tumour boards

Why the course is unique

- Real multidisciplinary faculty teaching live
- Case-based integration of systemic therapy with radiotherapy and surgical management
- Curriculum-mapped content ensuring ensure your practice reflects the most up-to-date evidence.
